HOUSE RUPERT INTERIOR DESIGN STUDIO

www.houserupert.com

Founded by Bailee Roberts, HOUSE RUPERT is renowned for creating residential and boutique commercial interiors that embody quiet luxury. With a blend of European sensibility and Californian cool, House Rupert emphasizes beauty, functionality, and sustainability.

“Spending 15 years in Europe and traveling extensively has shaped my approach to design. One moment, you’re in a sleek, modern space; the next, a grand hall that has stood beautifully for centuries. What always captivates me is the feeling a space evokes—the sense of care and intention behind it, whether it’s a hotel lobby, a restaurant, or a beautiful home. Great design isn’t just about aesthetics; it’s about atmosphere. I love blending the old with the new, mixing wood and metal to add depth and texture. That contrast creates an organic warmth that makes a space feel both cultivated and timeless.”
